Key Qualifications

Graduate level Computer Science student with an eye for UI/UX. Experience in full stack web development through past work and personal projects. Frequently exploring new programming languages, tools, and frameworks to foster my curiosity and staying updated on the latest trends.

Education

Aug. 2023 – Jun. 2024	**University of California, Berkeley** Computer Science (exchange year)
Aug. 2020 – today	**Norwegian University of Science and Technology (GPA 4.6 / 5)** Computer Science, Master of Technology

Experience

Jun. 2023 – Aug. 2023	**Capra Consulting** – Summer Developer Intern My team worked with Campio, a digital platform for booking campsites in Scandinavia. We developed a loyalty program from scratch, where users can earn bonus points for bookings. Points can be spent on various products, like gift cards for new Campio bookings. The program was launched this summer, and hundreds of users have already earned Campio Points. The team worked full stack in Campio's existing codebase, consisting of TypeScript, Express, Next.js, and Angular.
Jun. 2021 – Jun. 2023	**Cloud Insurance** – Developer Intern Started as a six-week summer internship, during which I developed a customer journey using Vue in collaboration with two other summer interns. We integrated our application with the company's existing APIs. I continued in a part-time position for two years, where I primarily worked on frontend and UI/UX tasks.

Student organizations

Jan. 2022 – today	**NTNUI Sprint** – Full Stack Developer Developing and maintaining the membership system of NTNU's sports association together with a team of around 15 students. The membership system is built with Django and Vue and is already in use by several thousand NTNUI members.
